MÜNCHEN

## Hotel Vier Jahreszeiten goes green

The Hotel Vier Jahreszeiten Kempinski München is going "GREEN". The Kempinski initiative "earth check", the participation in climate protection projects as well as the sought certificate with the Bavarian environmental seal would like to prove this.

Axel Ludwig, the director of the hotel, prescribed this theme and is ready to realize these ecologically and environmentally- oriented goals with his team.

Below, we will inform you about some of our current activities:

- \* Exclusively, the entire hotel will use FSC paper as well as recycled paper. This way we make sure, when it comes to wood products, to conserve the use of the sustainable forest and its resources.
- \* We, in the Kempinski The Spa, treat you with natural products of the line such as "Elemental Herbology".
- \* We use environmentally friendly sanitized articles in many washroom facilities and were recognized for this.
- \* We do not offer you industrial honey! A bee hive, with 40,000 bees, lives on top of our roof which produces your honey.
- \* We exclusively receive ecological electricity from the "Stadtwerk Muenchen" and have already exchanged most of our hotel bulbs with energy- saving ones.
- \* In our kitchen, we mainly process fresh regional and seasonal products for you.

MÜNCHEN

And so, you can also, for the sake of the environment, support our cause:

\* The Kempinski Tree stands in your disposal, to avoid a daily linen change. As long as you leave it on your bed in the morning, the bed will be made but not freshly covered with new sheets.

\* If you wish to use your towels several times, please hang them up. To receive fresh towels, please leave the used ones on the floor.

Many more actions are in planning and we will keep you informed.
